WORK EXPERIENCE

Senior Software Test Engineer - WillowTree, Columbus, Ohio   *01/2021 - present*
Senior Quality Assurance Specialist - WillowTree, Columbus, Ohio   *10/2019 - 01/2021*

- o Member of multiple teams on a multi million dollar project for a mobile application rewrite into React Native
- o Utilized Proxyman to rewrite network and capture network traffic for testing purposes
- o Updated and managed the mobile application automation test framework, utilizing Espresso and Kotlin for enhanced efficiency.
- o Collaborated effectively and demonstrated strong teamwork abilities beside cross-functional teams (iOS, Android, Middleware) to ensure seamless testing coverage across the product.
- o Onboarded and integrated new team members to ensure seamless project collaboration.
- o Offered expert mentorship to interns, fostering professional growth and knowledge acquisition in the team.
- o Utilized WireMock to execute comprehensive UI test cases for mobile applications, guaranteeing reliable and efficient testing.
- o Introduced innovative ideas to enhance workflow efficiency for the client.
- o Designed, maintained, and carried out an extensive automation suite using Cypress, spanning multiple client brands.
- o Managed and optimized TeamCity configurations to enable frequent automation suite runs on various platforms, environments, and client brands.
- o Devised a comprehensive testing strategy for multiple WillowTree projects.
- o Directed meetings with the client's Product Owner to align test cases and strategy with business objectives while also collaborating closely with the development team.

Senior Software Quality Analyst - NetJets, Columbus, OH   *01/2019 - 10/2019*

- o Established a brand new team for a high-impact, Tier 1 $10 million multi-year project encompassing all lines of business that would involve 35+ integrations.
- o Assumed the role of Key QA for a critical Tier 1 project, overseeing test strategy, data migration, configuration, and integrations for a new company-wide HR system
- o Orchestrated seamless testing collaboration among multiple teams.
- o Pioneered an initiative to standardize testing and defect dashboards across all development lines within the company.
- o Developed a comprehensive QA wiki page to streamline onboarding and enhance visibility into QA processes for others.
- o Actively participated in the mentorship program as a mentee, gaining invaluable business insights.
- o Contributed to the customization of JIRA (Cloud) for the team, being one of the two teams using the cloud instance of JIRA company-wide.
- o Managed evaluations of multiple software products for potential automation implementation.
- o Held meetings with business partners to gain essential business knowledge for the project's success along with prioritizing critical testing scenarios.
- o Executed rigorous testing of integrations with Amazon Web Services (Lambdas and Step Functions) and Kafka streams.
- o Skillfully onboarded and offered ongoing guidance to a test engineer within the team.

Specialist - Nationwide, Columbus, Ohio   *05/2015 - 01/2019*

- o Served as a test lead for multiple projects ensuring seamless coordination with other test leads across the enterprise.
- o Spearheaded software quality assurance initiatives within the MCC organization, promoting cross-skilling and collaboration.
- o Efficiently scheduled and carried out interviews for new team members, guaranteeing the right talent acquisition.
- o Developed a comprehensive release health check report, providing key stakeholders with real-time status updates during releases.
- o Implemented digital analytics (Google Analytics, Floodlight, Visual IQ, etc.) across web sites and applications enterprise-wide while utilizing ObservePoint to audit analytics health
- o Played a pivotal role in implementing new processes for the team which resulted in a 450% increase in work requests released in 2015 by performing continuous delivery and saving $50,000 by introducing a more efficient work intake process.
- o Created comprehensive QA onboarding documentation to facilitate the integration of new team members seamlessly.

Senior Analyst - Nationwide, Columbus, Ohio   *08/2012 - 05/2015*
Analyst - Nationwide, Columbus, Ohio   *03/2011 - 08/2012*

- o Expertly maintained the automation framework for a feature-rich application, utilizing Ruby, Gherkin, and Cucumber.
- o Proficiently authored and executed test scripts through Quality Center, ensuring comprehensive testing coverage while also conducting an in-depth analysis and review of requirements.
- o Demonstrated proficiency in writing complex SQL queries to enhance testing capabilities.
- o Provided accurate estimations at the epic and story card levels, contributing to effective project planning.
- o Recorded and researched defects to leadership promptly using Quality Center, enabling informed decision-making and prompt resolution.
- o Skillfully led a team of 6 testers, fostering a collaborative and high-performing environment while offering guidance and addressing their queries.
- o Actively recommended changes to improve job performance, processing, and workflow for optimal efficiency.
